Kshitij Deshmukh

Data Science | AI/ML | GenAI

+91-9822200441 | kshitijkdeshmukh@gmail.com | linkedin.com/in/kshitij-deshmukh | github.com/Kshitij537

Professional Summary

Computer Engineering undergraduate with hands-on experience in **AI/ML, Generative AI, backend development, and full-stack applications**. Currently contributing to an **LLM Gateway** at Persistent Systems focused on intelligent model routing, session management, authentication, and local LLM inference. Previously developed AI-powered social media monitoring solutions involving Machine Learning, REST APIs, data processing, and React.js dashboards. Skilled in Python, React.js, PostgreSQL, Supabase, LangGraph, and LLM-based application development.

Technical Skills

Languages: Python, C++, C, Java(Moderate), JavaScript, SQL
Backend & APIs: Node.js, Express.js, REST API, JWT Authentication
Frontend: React.js, Vite, Tailwind CSS
AI / ML & GenAI: Machine Learning, Computer Vision, LangGraph, Multi-Agent AI, LLM Applications
Databases: PostgreSQL, Supabase
Libraries & Tools: Pandas, NumPy, OpenCV, Git, GitHub, VS Code

Experience

Apprentice Program – GenAI | LLM Gateway Project **Jul 2026 – Present**
Persistent Systems *Nagpur, Maharashtra*

- Contributing to a multi-model **LLM Gateway** that provides a unified interface for intelligently routing user queries to suitable open-source LLMs.
- Developing the web application using **React.js, Vite, Tailwind CSS, Python, and RestAPI**, with local LLM inference through **Ollama**.
- Working on **session management, rate limiting, backend architecture, API integration, and Supabase/PostgreSQL database integration**.
- Integrated **Supabase Authentication/OAuth** and contributed to LLM research and model evaluation, with **Qwen 3.5:4B** currently integrated and architecture supporting additional models.
- Contributed to end-to-end chat workflows and **9 model-router tests** validating model selection and routing functionality.

AI/ML & Full Stack Developer Intern **Aug 2025 – Feb 2026**
Cybrainyx – Garudadrishti, AI-Based Social Media Monitoring System *Nagpur, Maharashtra*

- Developed AI-powered features across **Machine Learning, data processing, backend services, and application development** for an intelligent social media monitoring platform.
- Optimized **3 Machine Learning modules** and developed **10+ REST API endpoints** using Node.js and Express.js for authentication, reporting, scraping, and workflow automation.
- Built **8+ React.js dashboard interfaces** and collaborated with a 5-member cross-functional team on testing, debugging, deployment, and feature development.

Projects

NyaySathi – AI-Powered Legal Complaint Management | *Python, LangGraph, React.js, Node.js* **[GitHub]**

- Architected a **multi-agent LangGraph workflow** for complaint analysis, case prioritization, staff assignment, and automated document generation, with role-based authentication and complaint tracking.
- Implemented structured complaint workflows and **role-based case management** to support efficient tracking and resolution across the application.

AgriChain – Smart Agriculture Platform | *Python, ML, PostgreSQL, React* **[GitHub]**

- Built a data-driven agriculture platform using **Machine Learning and Google Earth Engine** for crop disease detection, spoilage prediction, price forecasting, and NDVI-based vegetation analytics.
- Integrated **secure REST APIs with JWT authentication** and geospatial farm visualization using Leaflet and React Leaflet for interactive agricultural monitoring.

Achievements

- Secured **Top 15** in the Swalambh Hackathon at St. Vincent Pallotti College of Engineering.
- Secured **Top 10** in the ClaudeSolvathon at IIIT Nagpur.
- Presented the **Garudadrishti AI platform** before Hon. Chief Minister Devendra Fadnavis.

Education

St. Vincent Pallotti College of Engineering & Technology **2023 – 2027**
B.Tech. in Computer Engineering *Nagpur, India*
